Subject: Bradford Island - Cancellation of 18 August TAG Meeting

Hello TAG,

This is a heads up that I plan to have Dan send a meeting cancellation notice for the 18 August TAG meeting from 10-12. There were no specific agenda items identified for this meeting and the team could really use that time to prepare for the bass/crayfish/sculpin sampling work that starts on 24 August. In the meantime, a few deliverables will be provided via email:

- The final bass and crayfish QAPP with revisions (including a redline copy showing changes) based on TAG comments will be provided August 14th. A response to comments table will also accompany the final QAPP.
- Porewater results from the passive sampling effort this past winter were recently received. The informal results in Excel format will be sent for your review. TTU is still working on a formal data report, but we will provide the informal results to the TAG as soon as possible so that you can begin looking over the data. While all the questions associated with the results may not be fully resolved, we are hoping to incorporate these results into sampling associated with the clam QAPP as well as potentially adjusting a few of the samples that we selected for the full 209 congener analysis. More discussion to come on both these topics.
- The final clam QAPP will be sent later in September prior to fieldwork for clams beginning on September 21st. We need additional time to consider the passive sampling results and coordinate with the TAG on adjustments to sampling locations.
- Once fieldwork starts the week of August 24th, the team will send periodic field updates to keep you apprised of the progress.

Once fieldwork is complete we will schedule a new series of TAG meetings starting in October. We will hopefully have a call at that time with Danny Reible from TTU to discuss the porewater results in more detail and answer any questions.

We'd like to schedule a 1 hour conference call on 8 September from 1-2 to discuss fieldwork and provide general updates. Please let us know if this date/time works for you.

Thank you,
Chris Budai
Project Manager
